

SSBIU CABINET FOR CLOTHES AND SHOES DRYING

Description

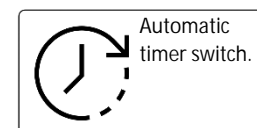

The cabinet with slats allows you to store 10 sets of work clothes and transparent lamellas. The lamellas protect the chamber against excessive heat loss and facilitate drying process. The space for storing shoes consists of 20 tubes on which you can hang shoes and leave them to dry. Warm air flowing through the pipes gets inside the shoes and effectively dries them. The tubes are long enough to dry all types of shoes. The cabinet is suitable for drying ski clothes and shoes.

Fan speed control allows you to change the air flow speed and temperature. The cabinet is made of galvanized steel, ensuring durability and corrosion resistance. It is available only in an unpainted version. The standard cabinet has a resettable fuse and thermal protection, which increases safety in the event of improper operation, protects the installation and prevents breakdowns. Cabinet is equipped with soundproofing mat, that reduce the noise generated when drying. Cabinets have five-year guarantee! In the first period (24 months), the Guarantor is responsible for all manufacturing defects of the product. In the remaining period (36 months), the Guarantor is responsible for the functional properties of the product, such as the varnish coat and durability of connections of the product elements (welding).
