

# FILING CABINETS NSzk TOP CABINETS

## Description

Top cabinets are a great idea to increase capacity of filing cabinets, as they do not require additional space in the room. Top cabinets are assembled together with the base unit with use of self-drilling metal screws. Additionally, the set includes expansion bolts for fixing cabinets to a wall, thanks to which this solution is completely safe. The internal equipment of top cabinets is the same as in base cabinets, to which top cabinets were designed. NSZK top cabinets meet requirements of GDPR. They are an optimal choice wherever you want to extend the storage space for documents while saving space in the room.

Top cabinets are made of 0.8 - 1.5 mm thick metal sheet. They are equipped with double extension telescopic ball bearing slides that protect a drawer against falling out. They are also equipped with a pull-out block that allows you to open no more than one drawer at a time - this is an additional improve of safety. The maximum load of the drawer is 50 kg. The content of NSZK top cabinets is secured by a central lock which locks all drawers at the same time.

Product does not need to be assembled, so it gains in strength and stability. The cabinets are available in 16 colours in as a part of our standard offer.

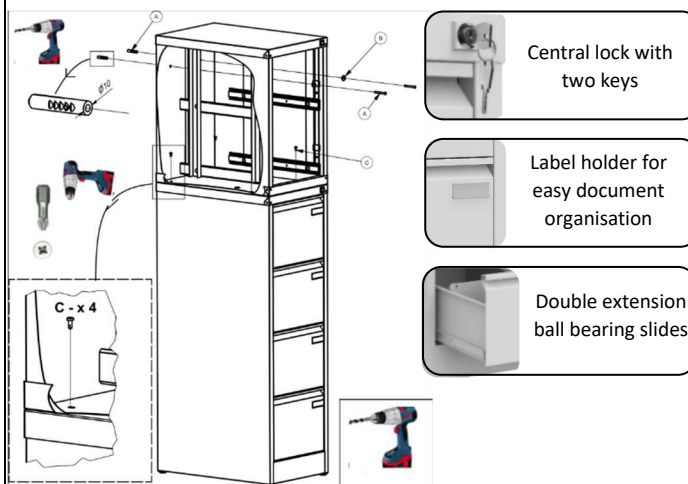

To ensure very good surface quality of steel sheet, the zirconium phosphating and zirconium conversion process was used before powder coating. This process ensures adequate corrosion protection for the specified environment and guarantees high adhesion for the powder coating.

By buying our product you support ecology, as cabinets made of metal are more durable than furniture made of other materials - you can easily repair, repaint or simply recycle them. Our factory is powered by solar energy, significantly reducing CO2 emission, in addition, more than 90% of waste powder paint after recycling goes back into production.

## Characteristics

Version  
ST

- 5 years warranty (according to Malow's conditions).
- Body and drawer fronts made of 0.8 – 1.5 mm thick steel sheet. Other elements of drawers made of 0.6 – 0.8 mm thick steel sheet.
