

Description

NSUM extensions are dedicated equipment for Malow social wardrobes. Extensions can be added to existing structures. NSUM extensions provide additional storage space in the same area. In the extension, you can store personal items and less frequently used items that may unnecessarily take up space in the base wardrobe. The structure of the extensions allows them to be mounted on all standard WSU group cabinets and selected models from the MSU group. Safe use of extensions requires screwing them to the basic cabinets - all necessary screws are included in the set. NSUM extensions create a coherent whole with shoe cabinets mounted to WSU bases. NSUM extensions are equipped with cylindrical locks - each comes with two keys as standard. Perforated doors provide ventilation inside the box.

The extensions are available in 16 RAL colours as standard so that they can be easily matched to the existing development. All Malow products are covered by a 5-year manufacturer's warranty.

Features

- 5 years warranty (according to the warranty conditions for Malow products).
- Extensions made of cold-rolled steel sheet, thickness: 0.5 – 0.6 mm.
- The extension requires repairs with the main cabinet - the necessary equipment is included in the extension set.
- The extension is equipped with cylindrical locks with keys as standard. On request, it is possible to use a key with the same number as in the main cabinet lock.
- Door with perforation enabling ventilation of the interior of the compartment.
- NSUM extensions are available for all WSU devices and selected MSU models.
- Powder-coated furniture, available in 16 RAL colours as standard.

Elements for screwing together with the basic wardrobe are included in the set.

Cylinder lock with 2 keys as standard.

Interior ventilation thanks to perforated doors.

Extra storage space in the same space!

Description of markings

A 5-year warranty proves that we are confident in our products due to their high quality and reliability. We want you to feel safe and satisfied with your cooperation with us.

As standard, we offer 16 colors from the RAL palette. Thanks to this, our furniture can be adapted to any interior.

The ISO certificate confirms compliance with standards and the high quality of the products and services we offer.

The zirconia technology used ensures very good anti-corrosion protection of the cabinets. Additionally, this process improves paint adhesion.

We test the cabinets in our own laboratory - the Research and Development Center (CBR).
