

Description

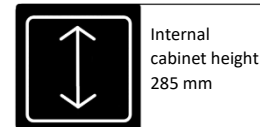

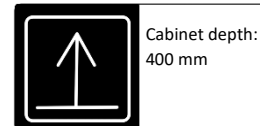

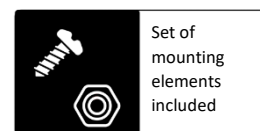

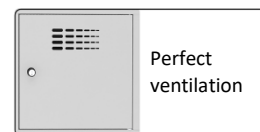

SNB shoe cabinets are a practical solution for storing shoes, especially in employee changing rooms. They can be mounted to economic bases with a seat, on which there are lockers. SNB shoe cabinets are a convenient, functional and durable solution that will facilitate the storage of shoes and provide additional space. It is possible to use locks, such as single-point, padlock or combination locks. On special request, it is possible to use the same key for the wardrobe and the shoe cabinet, which allows you to reduce the number of keys needed. The cabinet has a cover that prevents dust accumulation, making it easier to keep the area around the cabinets clean. Reinforced doors have ventilation, which ensures good air circulation and helps to get rid of moisture and unpleasant odours.

The base on legs with shoe cabinets is a perfect solution for companies, institutions, schools, gyms and other places where there is a need to store shoes separately in a safe and organized way. Thanks to the SNB, it is possible to store footwear separately from clothing, thus keeping footwear safe. In addition, clothing does not smell like shoes.
